

# HUNTER PEAK FIRE

---

## Incident Action Plan

WY-SHF-000428 / KLM4

Day Operational Period  
**TUESDAY, AUGUST 16, 2016**  
0600 - 2000

**Rocky Mountain IMT1**  
Todd Pechota, Incident Commander  
Dan Dallas, Deputy  
Tim Reid, Trainee

Link To Maps  
GPS: UTM NAD83 ZONE 12N

# INCIDENT OBJECTIVES (ICS 202)

<b>1. Incident Name:</b>		<b>2. Operational Period:</b> DAY	
HUNTER PEAK		Date/Time From: 08/16/2016 0600 TUE	Date/Time To: 08/16/2016 2000 TUE

**3. Objective(s):**

**Strategy: Full Suppression:** Assess risk and suppress fire where values are threatened. the probability of success is good and risk to firefighters is acceptable. Take advantage of fuels reduction work and open fuel types to protect private structures and property. Avoid taking action on portions of the fire where there are no current or future threats to identified values at risk.

**Objectives**

Base strategic and tactical decisions to deploy firefighters, aviators, and support personnel on values at risk, exposure to hazards, potential consequences, and probability of mission success. Within that context:

1. Utilize LCES, closures, etc. to provide for safety of incident personnel and the public.
2. Minimize economic impacts to local communities and tourism by maintaining open travel corridor on Highways 296 and 212.
3. Protect private structures/property and infrastructure along CR XUX (Squaw Creek Road) and Highway 296 (Chief Joseph Scenic Highway). Specific areas include upper Squaw Creek subdivision, lower Squaw Creek subdivision, Squaw Creek Ranch, Crandall Creek structures, Hunter Creek Ranch, and other properties east of Highway 296. Protect power line along Highway 296 to minimize impacts to Cooke City, MT.
4. Minimize adverse impacts to sensitive resources by fire and fire suppression activities. See Shoshone NF Resource Protection Guidelines (2016).
5. Keep fire on the south side of Highway 212 and west of Highway 296.
6. Keep public and stakeholders informed through use of press releases, community meetings, and other activities.

**4. Operational Period Command Emphasis:**

**Manage operational tempo of aircraft use to provide an added margin of safety for aviators and fireline personnel. Exercise extreme caution and situational awareness of snag hazards.**

**General Situational Awareness:**

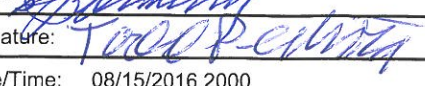

**ALL RESOURCES MUST RECEIVE BEAR TRAINING PRIOR TO GOING TO THE FIELD.**

**5. Site Safety Plan Required?** Yes ☐ No ☒

**Approved Site Safety Plan(s) Located at:**

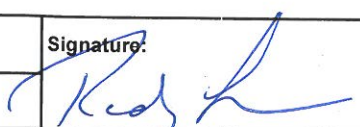

**6. Incident Action Plan** (the items checked below are included in this Incident Action Plan):

## INCIDENT Weather Forecast

FORECAST NO: 6

NAME OF FIRE: Hunter Peak

PREDICTION FOR: SHIFT

UNIT: IMET

SHIFT DATE: 08/16/16

SIGNED: *David A. Lipson*

TIME AND DATE

FORECAST ISSUED: 2030/08/15/16

Incident Meteorologist

David Lipson

**WEATHER DISCUSSION:** Today will be a rather benign day weather wise, as a flat area of high pressure builds into the area. We will keep our easterly wind component but it should be more east southeasterly and fairly prominent along most of our drainages. Then on Wednesday we should see rather warm temperatures along with fairly low relative humidity. This will be the last really warm day for a while to come. An upper level trough of low pressure will move in from the Great Basin and create a slight chance of late day thunderstorms Wednesday. Then on Thursday, the trough will bisect an approaching strong cold front. This will result in increasing winds and widespread showers and thunderstorms along with much cooler weather. A wetting rain is likely on Thursday. Then on Friday, a secondary reinforcing cold front will push through resulting in a cool showery day along with the potential for record low, high temperatures. Weather conditions will be drier for the weekend but still cooler than what we have been accustomed to.

### **WEATHER FORECAST:**

**WEATHER:** Mostly sunny with some afternoon cumulus build ups. Only an isolated shower or possible thunderstorm late.

**TEMPERATURES:** 77 at 6800 feet and 71 at 8600 feet.

**HUMIDITY:** 19 to 22 percent.

#### **20 FT WINDS:**

**RIDGETOP** – Light and variable. Then by 1000 east southeast upcanyon winds at 3 to 6 mph. Then by 1200 southeast 10 to 18 mph.

**SLOPE/VALLEY** - Light downslope winds. Then east southeast upcanyon winds at 3 to 5 mph after 1000. Then by 1200, east southeast winds at 6 to 12 mph, except 10 to 15 mph along the Blacktail Creek, east 6 to 12 mph along the Crandall Creek, and southerly along the Cow Creek at 6 to 12 mph.

**HAINES INDEX:** Between a 5 and a 6.

**STABILITY/INVERSION:** Inversion dissipating by 1000.

**OUTLOOK FOR WEDNESDAY:** Mostly sunny in the morning. Increasing cloudiness in the afternoon. Widely scattered late afternoon and evening thunderstorms. Highs 73 to 80. Minimum relative humidity 20 to 23 percent. Southwest winds 10 to 18 mph, becoming northwest 12 to 22 mph later in the afternoon.

**OUTLOOK FOR THURSDAY:** Showers and thunderstorms likely along with a good chance of a wetting rain. Highs 60-67. North northeast winds 10 to 20 mph.

**EXTENDED FORECAST:** On Friday, a secondary cold front will likely keep high temperatures only in the 50s. It will be cool and chilly with frequent showers likely. Drier weather for the weekend, but temperatures will recover, but still much cooler than the temperatures have been during the last several days.

# FIRE BEHAVIOR FORECAST

<b>FORECAST NUMBER:</b> 6	<b>TYPE OF FIRE:</b> Wildland Fire
<b>FIRE NAME:</b> Hunter Peak	<b>OPERATIONAL PERIOD:</b> August 16, 2016 0600-2000
<b>DATE ISSUED:</b> August 15, 2016	<b>TIME ISSUED:</b> 2030
<b>UNIT:</b> Shoshone National Forest	<b>SIGNED:</b> Boyd Lebeda, FBAN <i>Boyd Lebeda</i>

## INPUTS

**Fuels** – The primary fuel types for the fire are a Grass fuel type (GR2), two Timber Litter fuel types (TL1, TL4), and a Timber Understory fuel type (TU4). The lighter fuel loading areas have moderate fire behavior – heavier fuel loading areas have more aggressive fire behavior.

**Weather Summary:**  
See Incident Weather Forecast

**Topography** – fire is on a prominent ridge in a river canyon with drainage areas on the south, east and north.

## OUTPUTS

### FIRE BEHAVIOR

#### GENERAL:

Today will be an active burning day. Should be favorable conditions for burnout operations. Monitor weather conditions and fire activity: high Haines 5; relative humidity 19-22%; with up canyon winds.

ERC (Fuel Model G) for the Hunter Peak Fire area is 61. The local ERC threshold identified on the pocket card is 61. When fuels, slope and wind align – expect active fire behavior: passive crown fire, and spotting. Expect spot fires to establish and begin to spread where fuel is available.

Spotting distances are up to 0.3 miles. Probability of Ignition is 70% plus. In conifer stringers expect surface rates of spread up to 15 to 20 chains/hour with passive crown fire (torching) where fuels are available. Grass fuel types have shown modest spread rates 4 to 8 chains/hour.

#### SPECIFIC:

**Divisions A:** Watch for the possibility of spot fires below the rock rim. Expect interior burning with surface spread and torching and possible spot fires down slope.

**Division D:** East winds will be adverse for the line in Division D. Watch for the possibility of spot fires into the Cow Creek drainage. In areas with available fuel expect upslope runs, surface spread, flanking, backing, group torching and spotting in drainages.

**Division T:** Watch for the possibility of spot fires into the Squaw Creek drainage.

**Division W:** Watch for increased fire activity with the east wind.

### AIR OPERATIONS

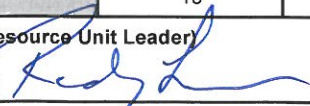

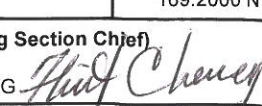

Inversion as well as gusty, erratic winds from thunderstorm development may hamper air operations.

### SAFETY

#### FREQUENT SPOT FIRES ACROSS THE LINE – DESCRIBES THE POTENTIAL YOUR FIRE HAS.

- Can you handle increased spotting?
- List some ways you can keep ahead of spot fires (gridding the green, lookouts, etc.)?
- What is your probability of ignition doing? Is it increasing or decreasing?
- Do you have a plan for long-range spotting?
- In what fuel type and under what conditions will you likely have long-range spotting?
- What types of plans can you think of for handling long-range spotting?
- Is help available if necessary? What kinds of resources will you have in place or order to handle spot fires?
- If fire behavior increases, is your position still defensible? Discuss what type of action you might take if a spot fire grows.
- Do you have more than one safety zone in case one gets cut off? Describe how you might have multiple safety zones.

# Restock/Replacement Procedures for Government Property

## Gone is the old culture!

Gone are the days when we used to use fire suppression funds from project fires to repair and replenish our inventory and gear. No longer can we take advantage of project fires in this manner according to NWCG. They have told us that since most items are provided by home units using preparedness funds, **we cannot use the project fire codes to replace or repair anything damaged due to normal wear and tear.** We are told that the home unit needs to plan for and replace things that are just wearing out, not the fires.

## Specific Events

If there is a specific event on our incident that causes more than normal wear and tear (such as a wind event destroying tents) we will work with you on getting the correct documentation so that it can be replaced or repaired. Be aware, however, that further direction is that **we cannot replace or repair non-standard cache items.** In other words, if your tent is destroyed with a wind event we can give you another tent, but it will be one that is available from the cache and might not be exactly what you had before if you didn't carry the standard tent. This is true for such things as Kevlar pants (you'd get the standard greens from Supply), sleeping bags (again – cache bags), packs (no Eagle packs, just the standard), etc. **We can ensure that the correct documentation is done to turn in to your home unit for consideration of replacement of non-cache items from home.**

## So what do you need to do to get what you need?

First of all, don't wait until the last minute to say you need something replaced. If your crew used up their MREs and you know you need to replenish that stock before you leave, go talk to the folks in Supply and get the stock replenished right away. If you are going to be on the incident for a while we may be able to order in things that you need (such as chainsaw parts) if we don't have them already on hand. Then you can be demobed ready to hit the ground running again. (Keep in mind, though, that we won't build you a new chainsaw from parts, but will take care of what we fairly feel was impacted by the incident. )

If equipment and supplies **are available** at the incident for replacement, the request is filled at the Incident Supply Unit.

If equipment and supplies **are unavailable** at the incident for replacement, **and the requesting resource is not being immediately demobilized**, the Supply Unit will place a resource order for needed items through appropriate channels to the cache. The order will be shipped to the incident and replacement will take place at the Supply Unit.

If equipment and supplies **are unavailable** at the incident for replacement, **and the requesting resource is being demobilized**, an Incident Replacement Requisition will be completed and forwarded to the cache.

## Getting questions from Supply about whether your needs are legitimate?

Good! This means they are doing the job that NWCG has asked them to do. However, we don't want to make this an ordeal for you, and they should be nice about it. You do need to submit your requests in writing on a General Message Form (213). Have your DIVS sign the 213 to verify that you did the work or were put in the circumstances to create the need. This is how we determine what is fair. If you have questions, please don't hesitate to consult with the Logistics Chief.

## How about the accountable stuff?

If you lose, damage or destroy a piece of government property on the incident, you have to go through the same hoops that you would back home to report it. First of all, **do not wait to report it!** Whether the property is assigned to you from home (such as a radio) or whether it was assigned to you at the fire (such as a radio or pump or chainsaw) you are responsible for it and must do the same paperwork. As the person responsible for the property you must **document the loss or damage on a Property Loss or Damage form.** (We use an AD-112 or OF-289, available from Supply). **You and your supervisor** (DIVS in most cases) and any witnesses must **document facts and circumstances on the form, and turn in the damaged or destroyed item.** The Incident Commander or Logistics Section Chief shall review, sign, and take any follow-up action. Type I and Type II incident replacement approvals are limited to the Incident Supply Unit Leader, Logistics Section Chief, Incident Commander, and Agency Administrator. Seldom will one of those folks approve anything that is not **verified in writing by the DIVS** or higher level Operations overhead.

If you come in at the end of the fire when everyone is demobing and say that your crew lost a couple of radios a few days ago and also damaged a GPS unit during IA, it's not going to look good and it will be difficult to round up the people and witnesses necessary to get the paperwork done in a reasonable amount of time to demob. Please do not wait until the end to report such loss or damage. It must be taken care of when or shortly after it occurs in order to get the witness statements, etc – not at demob.

**Rocky Mountain IMT  
SUPPLY ORDER**

Date & Time Order was placed	Order # (BR+DIVS + #)	Location & Time for Delivery (Division/LZ/DP/Lat Long)	Mode of delivery (Driven/Helo/DIVS to Pick up)

Order received in Communications by (name & time):

Order received in Supply by (name & time):

Order received in Transportation by (name & time):

Order received in Helibase by (name & time):

Order shipped to line unit by (name & time): (Send this sheet to the line with the order)

**Team Ordering/Timeline Process:**

0530 – Operations Briefing  
0600 - Morning Briefing, start of crew time.  
1100 - Last call to change spike camp resource hot food location.  
1600 - DIVS to have next day's resource order ready for Planning OPS.

DIVS or Branch will place all orders through Communications Unit.  
All orders will be tracked using the process found on this form.

\*GPS Datum: WGS 84- Degrees, Decimal, Minutes (DDMM.MM)\*

**Definitions**

**FOB-Forward Operating Base** is a secure forward position established to strategize, design and discuss tactics, and for personnel to transfer information and meet.

**Line Spike Camp**-Managed by Operations at the DIVS level; mobile, short duration and self-sufficient.

**Spike Camp**-Supported by Logistics, listed in the IAP, numbers in camp are set by 1100, named by Plans.

**Emergency Medevac**-Life threatening situation requiring immediate medical attention. Handled as per IAP med plan and team SOP's. Communications to clear command channel radio traffic.

**Medical Transport**-Transport of less serious injury/illness managed by Operations Section or line Medics back to camp for evaluation and/or treatment.

# **BEAR IN CAMP PROTOCOL**

## **Hunter Peak Fire**

**If a bear is observed in camp follow this protocol:**

- 1. Contact Communications and report immediately:**
  - **Bear (number)**
  - **Location**
  - **Behavior**
  - **Activity**
- 2. Communications will issue a general Alert and notification on Command and Logistics radio networks.**
- 3. Staff will STAY IN PLACE in their yurt and account for all personnel in their section/unit.**
- 4. Security will observe the bear as much as possible.**
- 5. Communications will contact the following personnel:**

**Andy – (307) 250-5783**

**or**

**Joe – (307) 899-5020**

## HEALTH AND SAFETY MESSAGE

### *Safety: It's Not About Rules, It's About Attitude*

#### Day Operations

INCIDENT: **Hunter Peak**

DATE: August 16

Day Operations

#### **Major Hazards and Risks:**

- **DRIVING:** Obey all posted speed limits, Share the roadway. Be aware of other drivers, wildlife and livestock. Be alert and watch for tourist and other recreational vehicles along Hwy 296.
- **HAZARD TREES:** Look up, Look down, Look around for signs of fire weakened trees. Follow the incident protocol on entering areas that have snags.
- **Bears:** Make sure you attend a bear safety briefing and receive bear spray before going out to the line. Don't keep food in your tent at any time. Backhaul all trash and eat at least 100 yds. from sleeping areas. Take a minute to review the Bear in Camp Protocol if you are located in camp daily.
- **Thunderstorms:** Occasional thunderstorms could become severe today, with small size hail in some storms. Review the IRPG Thunderstorm section on page 21. Be aware of roads and driving conditions after rain when roads become slick and more hazardous.
- **Personal Hygiene:** We want to avoid a camp crud outbreak as much as possible. Don't share personal items such as water bottles, communication devices, and utensils. Wash your hands before meals, and after use of rest room facilities.

#### Fire Order of the Day:

#### *Give clear instructions and insure they are understood.*

- **Task** = What is to be done
- **Purpose** = Why it needs to be done
- **End State** = How it should look when completed

#### **HAZARD ASSESSMENT**

**Put a voice to any situation that looks or feels unsafe  
Don't forget.....**

- Review pages 19-20 of the IRPG
- Dead trees may look sound, but could have a rotten interior
- Always use a spotter when falling snags
- Assess all snag areas before entering to determine if it is necessary at all

#### **Thanks from your Incident Safety Officers:**

Dave Vitwar SOF1, Tony Rivers SOF1(T)  
Jim Freestone SOF2, Bob Greenfield SOF2

**Rocky Mountain IMT says thanks to all of you for  
your outstanding safety record!!!!**

**Always think LCES.....**

*Tony Rivers*  
SOF1(T)

## Medical Incident Report- "9 Line"

**FOR ALL MEDICAL EMERGENCIES: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.**

**Use items one through nine to communicate situation to communications/dispatch.**

### 1. CONTACT COMMUNICATIONS/DISPATCH

*Ex: "Communications, Div. Alpha. Stand-by for Priority Medical Incident Report." (If life threatening request designated frequency be cleared for emergency traffic.)*

### 2. INCIDENT STATUS: Provide incident summary and command structure.

<b>Nature of Injury/Illness</b>		<i>Describe the injury (Ex: Broken leg with bleeding)</i>
Incident Name		<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>
Incident Commander		<i>Name of IC</i>
Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

### 3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient. This is only a brief, initial assessment. Provide additional patient info after completing this 9 Line Report.

Number of Patients:	Male / Female	Age:	Weight:
Conscious? <input type="checkbox"/> YES <input type="checkbox"/> <b>NO = MEDEVAC!</b>			
Breathing? <input type="checkbox"/> YES <input type="checkbox"/> <b>NO = MEDEVAC!</b>			
Mechanism of Injury: <i>What caused the injury?</i>			
Lat/Long (Datum WGS84)			

### 4. SEVERITY OF EMERGENCY, TRANSPORT PRIORITY

SEVERITY	TRANSPORT PRIORITY
<input type="checkbox"/> <b>URGENT-RED Life threatening injury or illness.</b> <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i>	Ambulance or MEDEVAC helicopter. Evacuation need is <b>IMMEDIATE.</b>
<input type="checkbox"/> <b>PRIORITY-YELLOW Serious Injury or illness.</b> <i>Ex: Significant trauma, not able to walk, 2° – 3° burns not more than 1-2 palm sizes.</i>	Ambulance or consider air transport if at remote location. Evacuation may be <b>DELAYED.</b>
<input type="checkbox"/> <b>ROUTINE-GREEN</b> Not a life threatening injury or illness. <i>Ex: Sprains, strains, minor heat-related illness.</i>	Non-Emergency. Evacuation considered <b>Routine of Convenience.</b>

### 5. TRANSPORT PLAN:

**Air Transport:** (Agency Aircraft Preferred)

<input type="checkbox"/> Helispot	<input type="checkbox"/> Short-haul/Hoist	<input type="checkbox"/> Life Flight	<input type="checkbox"/> Other
-----------------------------------	---	--------------------------------------	--------------------------------

**Ground Transport:**

<input type="checkbox"/> Self-Extract	<input type="checkbox"/> Carry-Out	<input type="checkbox"/> Ambulance	<input type="checkbox"/> Other
---------------------------------------	------------------------------------	------------------------------------	--------------------------------

### 6. ADDITIONAL RESOURCE/EQUIPMENT NEEDS:

<input type="checkbox"/> Paramedic/EMT(s)	<input type="checkbox"/> Crew(s)	<input type="checkbox"/> SKED/Backboard/C-Collar
<input type="checkbox"/> Burn Sheet(s)	<input type="checkbox"/> Oxygen	<input type="checkbox"/> Trauma Bag
<input type="checkbox"/> Medication(s)	<input type="checkbox"/> IV/Fluid(s)	<input type="checkbox"/> Cardiac Monitor/AED
<input type="checkbox"/> Other (i.e. splints, rope rescue, wheeled litter)		

### 7. COMMUNICATIONS:

Function	Channel Name/Number	Receive (Rx)	Tone/NAC *	Transmit (Tx)	Tone/NAC *
<i>Ex: Command</i>	<i>Forest Rpt, Ch. 2</i>	<i>168.3250</i>	<i>110.9</i>	<i>171.4325</i>	<i>110.9</i>
COMMAND					
AIR-TO-GRND					
TACTICAL					

\*(NAC for digital radio system)

### 8. EVACUATION LOCATION:

Lat/Long (Datum WGS84) <i>EX: N 40 42.45' x W 123 03.24'</i>	
Patient's ETA to Evacuation Location:	
Helispot/Extraction Size and Hazards:	

### 9. CONTINGENCY:

**Considerations:** If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead...

#### REMEMBER:

Confirm ETA's of resources ordered  
Act according to your level of training  
Be Alert. Keep Calm. Think Clearly. Act Decisively.
